Air Permit - Semi-Annual Deviation Report	Sept. 30

(1) Facility requirements should be verified to confirm due dates and other requirements.

(2) Nebraska: Submit electronically on SLEIS; Omaha: Submit manually as directed.

## Additional Environmental Requirements

**Stormwater:** Current General Permit expired on June 30, 2021 but has been administratively extended until a new permit can be issued. Watch for notifications from the NDEE early 2022 for potential changes and timeline. Once issued, an updated SWPPP & Notice of Intent (NOI) to discharge under the new permit will be due within 180 days of the permit issuance. Maintain records of quarterly inspections, outfall monitoring, and annual inspections with your SWPPP. Conduct and maintain records of annual training.

**Hazardous Waste:** Accurate waste determinations are a critical step in managing solid waste. The quantity of hazardous waste generated in a calendar month determines the applicability of federal and state requirements. Large Quantity Generators (LQGs) must submit a Biennial Hazardous Waste Report for the 2021 calendar year electronically using NDEE's RCRAInfo Industry Application.

**Wastewater (NPDES/SDS):** Submit discharge monitoring reports (DMRs) at regular intervals per permit requirements (electronically) at the EPA's NetDMR.

**SPCC Plan:** Update SPCC Plans every five years or whenever there is a change in oil storage or spill potential.

**Air Permit Applications:** Submit manually using forms on the NDEE/Omaha websites, respectively.
