

National PFAS Services

UNDERSTANDING PFAS SOURCES.

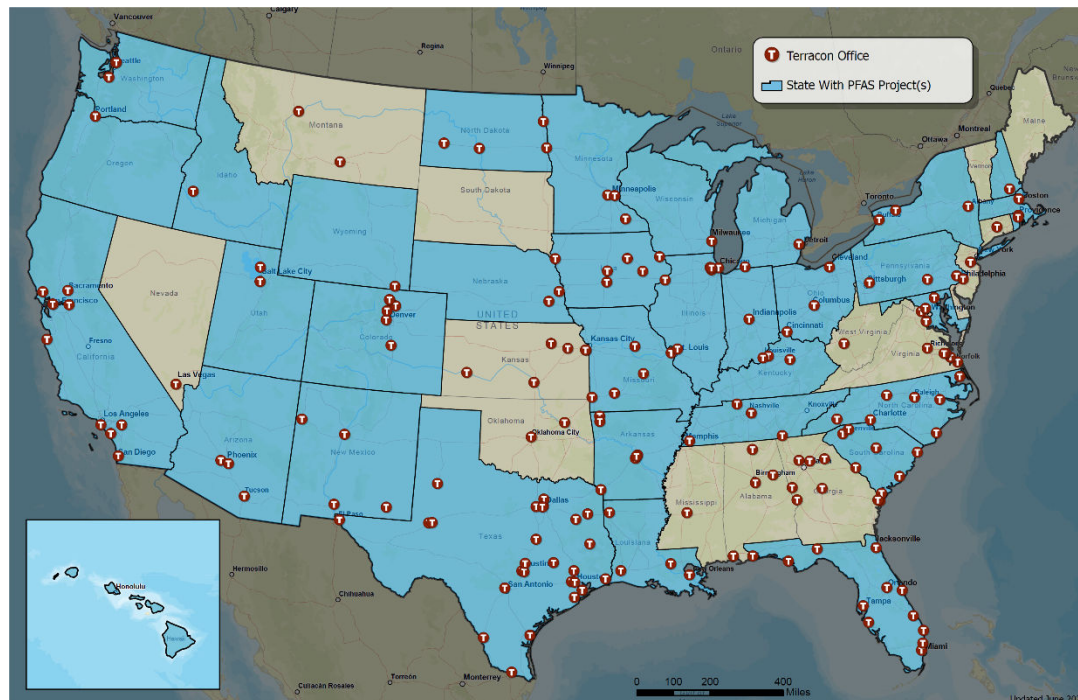

DATA-DRIVEN APPROACH.

PRACTICAL SOLUTIONS.

- **Network of state PFAS experts available nationwide with experience in state programs to benefit client needs**
- **Experience with PFAS projects across multiple states**

Our experienced nationwide team understands where PFAS can be found and the potential impacts. This team is also versed in relevant state and federal regulatory standards and current guidance regarding PFAS. Terracon can help you navigate the evolving discovery process to identify potential PFAS impacts and develop a plan of action for your commercial, industrial, or manufacturing site.

Understanding the latest trends and technologies for PFAS identification and remediation, the Terracon team has developed an extensive portfolio sampling various PFAS-impacted media across the country.
