

Environmental, Health and Safety Services

Industrial companies face the challenge of building resilient operations while navigating environmental and regulatory complexities in a rapidly evolving landscape.

Terracon's multidisciplinary professionals apply environmental best practices to help businesses thrive – today and into the future. With over 180 offices across the U.S., our teams are embedded in the communities where your build and operate, offering localized insight backed by national expertise.

Founded over 60 years ago, Terracon has grown into a team of more than 7,000 professionals, including over 1,500 environmental specialists. Our national network of experts supports local teams with specialized knowledge and regulatory guidance to meet the demands of industrial clients.

Whether you are in the earliest stages of a project or you have fully operational plants, we serve as a strategic partner – driving efficiency, continuity, and compliance. When environmental challenges arise, our work doesn't stop. We guide you through every step to keep your EHS tasks moving forward safely and effectively.
