

Sustainability and Resiliency Services

Inspired Solutions for our shared future

Achieving your impact goals starts with thoughtful planning and innovative solutions. Terracon is your trusted partner to manage and reduce your carbon footprints via GHG emissions calculation and reporting, energy use optimization, sustainable energy projects, and climate risk and resiliency assessments.

Our Sustainability and Resiliency (S+R) team collaborates with you and your community stakeholders providing innovative climate solutions and sustainable infrastructure directed at meeting short-term challenges and long-term goals.

Sustainability and Resiliency Services

SUSTAINABILITY AND RESILIENCY SERVICES

Our dedicated experts leverage Terracon's multidiscipline capabilities and nationwide resources to provide services in these practice areas:

Sustainability and Climate Solutions

We partner with organizations to help build resilient, future-focused organizations by delivering strategic and technical support across the full sustainability lifecycle. From program assessments and ESG strategy development to climate action plans, data management and emissions reporting, our integrated approach helps clients manage risk, meet regulatory and stakeholder expectations, and achieve measurable outcomes, goals, and targets.

Services Include:

- Program Assessments and Baselineing
- Sustainability/ESG Strategy and Program Development
- Data Management and Software Solutions
- Emissions Solutions and Climate Action Plans (CAPs)
- Sustainability Reporting and ESG Disclosures

Healthy and Sustainable Infrastructure

Terracon assists in optimizing the design, construction, and long-term performance of your real estate assets. We deliver operational and embodied carbon, water, waste, supplier engagement, and well-being strategies that accomplish climate and carbon reduction targets. We also apply our expertise across high performance building rating systems, including LEED, WELL, Fitwel, and SITES.

Services Include:

- Sustainable Design and Construction
- Healthy and Sustainable Materials Strategies
- Building/Facility Assessments and Certification
- Renewable Energy Development
- Community Support, Engagement, and Revitalization
